RE: Freedom Seat (Raised Toilet Seat for the Disabled)

The Freedom Seat has accomplished for the disabled in toileting what no other elevated toilet seat had been able to do:

Namely: Provide a raised seat to 19" that:

1. Integrates complete safety with the "Lever/Latch"
2. Has firm padded seating
3. Has side openings for perineal cleaning
4. Has quick on and off for height choice of 15" or 19"
5. Has stainless steel lifetime frame
6. Has totally encapsulated polyurethane seat pads
7. Has integrated arm assist frame to aid those who cannot use grab bars
8. Totally immersible for cleaning, if desired

I heartily recommend the Freedom Seat to anyone who needs a raised toilet seat. Both I and my father use the Freedom Seat.
